46. *Cryptocurrencies / Virtual currencies*

- 46.1. The Company may, at its sole discretion offer CFDs on cryptocurrencies for trading on its Online Trading Facility, from time to time. Cryptocurrencies, when used in this agreement, unless the context otherwise requires, shall mean a type of decentralized digital currency or asset which is not issued by any central bank or issuer in which encryption techniques are used to facilitate the generation of units of the currency or asset and verify the transfer of units (“Cryptocurrencies”).
- 46.2. The Client hereby acknowledges and accepts that Cryptocurrencies are traded on non-regulated decentralized digital exchanges and there is no specific European regulatory framework governing the trading in Cryptocurrencies. As such, Cryptocurrencies are not recognized as Financial Instruments under MiFID and trading in CFDs on Cryptocurrencies falls outside the scope of MiFID and of the Company’s MiFID regulated activities. Accordingly, the price formation and price movements of these products depend solely on the internal rules of the particular digital exchange which may be subject to change at any point in time and without prior notice. In this respect, the Client further acknowledges and accepts that this may often lead to wide fluctuation (i.e. high volatility) in the prices of these products, which may be substantially higher compared to the Financial Instruments offered by the Company that are under the scope of MiFID, and may result in significant loss over a short period of time.
- 46.3. The market and pricing data on Cryptocurrencies are derived from the digital decentralized exchanges that the Cryptocurrencies are traded on. Due to the fact that the market and data pricing formation rules on Cryptocurrencies, provided by such exchanges, are not subject to any regulatory supervision, they may be subject to changes in the relevant digital exchange’s discretion at any time. Likewise, such digital exchanges may introduce trading suspensions or take other actions that may result in the

suspension or cessation of trading on such exchanges or the price and market data feed becoming unavailable to the Company. The above factors could result in material adverse effect on the Client's open positions, including the loss of all of the Client's invested capital. Where a temporary or permanent disruption to or cessation of trading occurs on any digital exchange from which the company derives their price feeds for the relevant Cryptocurrency, the Client's positions in such Cryptocurrency will be priced at the last available price for the relevant Cryptocurrency, and the Client may be unable to close or liquidate their position or withdraw any funds related to such position until the trading on the relevant digital exchange resumes (if at all). The Client accepts that where trading resumes again at either the relevant initial digital exchange or on any successor exchange thereof, there may be significant price differential (price gapping) which may impact the value of the Client's CFD positions in the relevant Cryptocurrencies and result significant profit or losses. Where trading does not resume, all of the Client's invested capital could potentially be lost. The Client hereby acknowledges accepts that they have been informed by the Company of and understands this particular risk into account when taking investment decisions in respect of trading CFDs on Cryptocurrencies.

46.4. As Cryptocurrencies do not fall under the scope of MiFID, consequently, the Client is not entitled to the protections offered under the Investor Compensation Fund in relation to their trading activity that relates to Cryptocurrencies. Similarly, any complains and/or disputes the Client may have against the company which relate to trading on such products (i.e. Cryptocurrencies) are not eligible and shall not be accepted for review/consideration by the Financial Ombudsman of the Republic of Cyprus.

46.5. The Client hereby acknowledges, represents and warrants to the company that, when trading in CFDs on Cryptocurrencies, they fully understand the specific characteristics and risks related to these Cryptocurrencies and that trading in Cryptocurrencies and/or CFDs on Cryptocurrencies is not appropriate for all investors.
